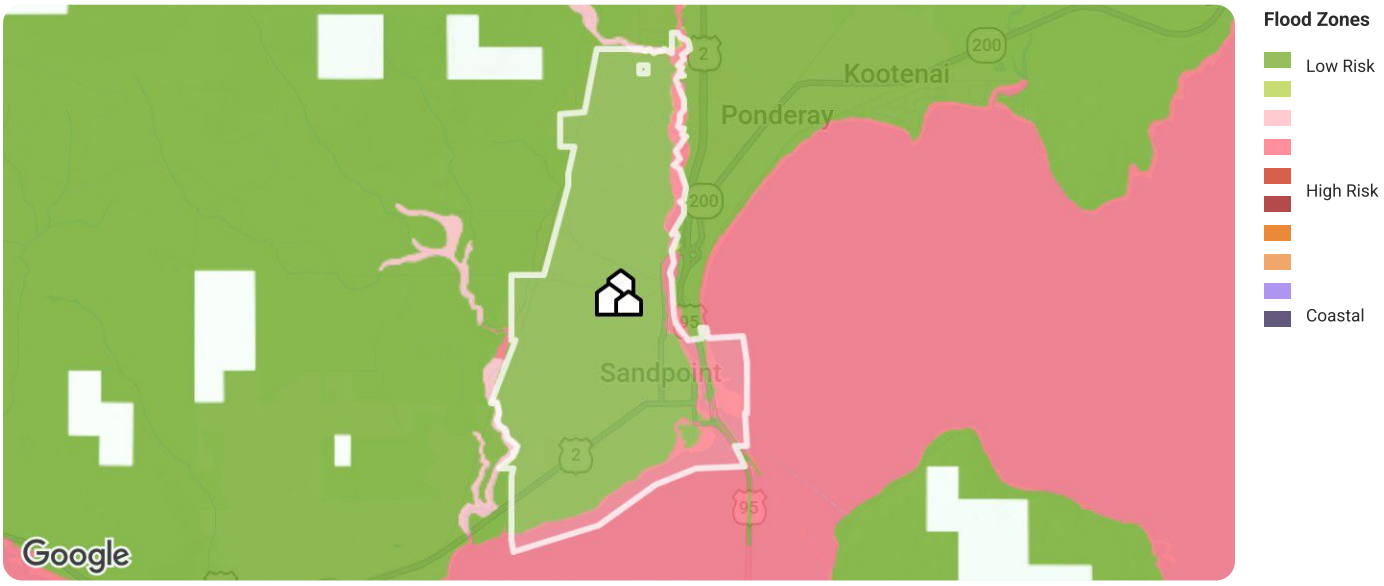
Data Layers

Flood Zones



This map layer shows an area's flood zone designation as determined by the Federal Emergency Management Agency (FEMA). A high-risk area has a 1 percent or greater annual chance of flooding and a 26 percent chance of flooding over the life of a 30-year mortgage. High-risk areas are red or orange. The coast areas, shown in purple, are also considered high risk. Green areas are low to moderate risk. A moderate-risk area is between risk limits of a 100-year and 500-year flood. White areas are undetermined, and all other areas are considered no or low risk. For more details on the categories of flood risk, see https://blog.narrpr.com/support/what-is-the-flood-zone-heat-map/.

About RPR

- RPR® is the nation's largest property database, exclusively for REALTORS®. It empowers REALTORS® to help buyers and sellers make informed decisions, backed by a real estate database covering more than 160 million residential and commercial properties in the United States.
- RPR is a wholly owned subsidiary of the National Association of REALTORS® and a member benefit to REALTORS®.
- RPR's data sources range from MLSs and county-level tax and assessment offices, to the U.S. Census and FEMA, to specialty data set providers such as Esri (consumer data), Niche (school information) and Precisely (geographic boundaries).
