Sold Listings

Peninsula in Long Beach, CA

Single Family Residence

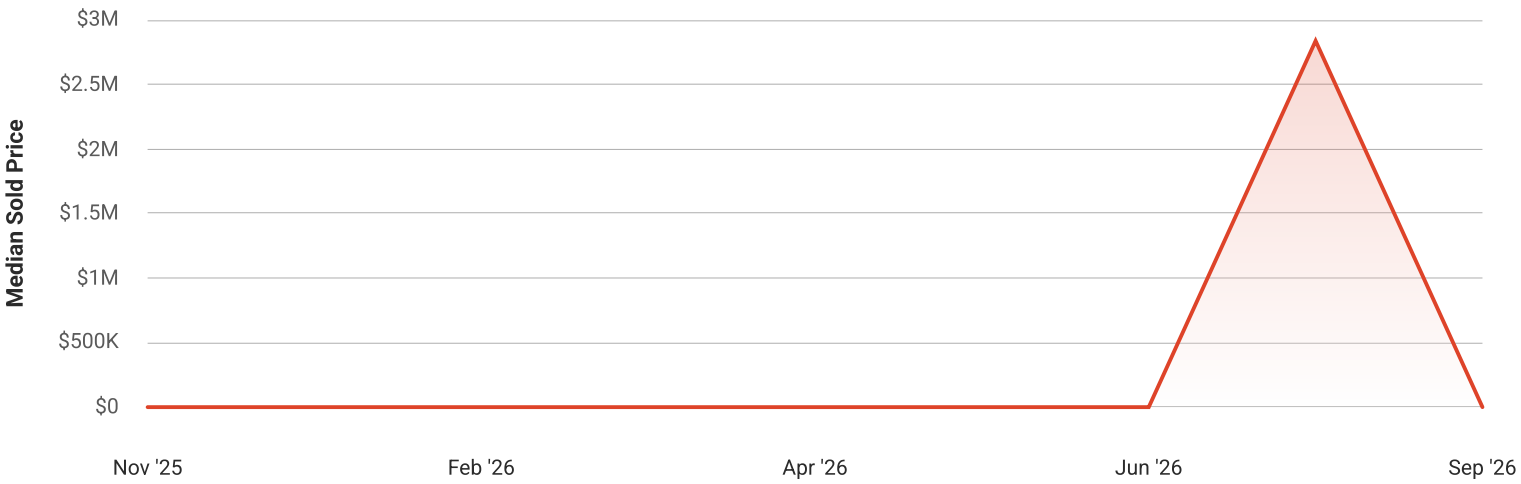

This graphic summarizes key statistics for properties that sold each month. RPR uses a derived sold date to determine when a property moved into a sold status within the given month. These statistics are important for understanding the price points on sold properties as well as the difference between the list price and sold price, which reveals whether buyers are paying over or under the asking price.

October 2026 Months Supply of Inv.

Peninsula in Long Beach, CA

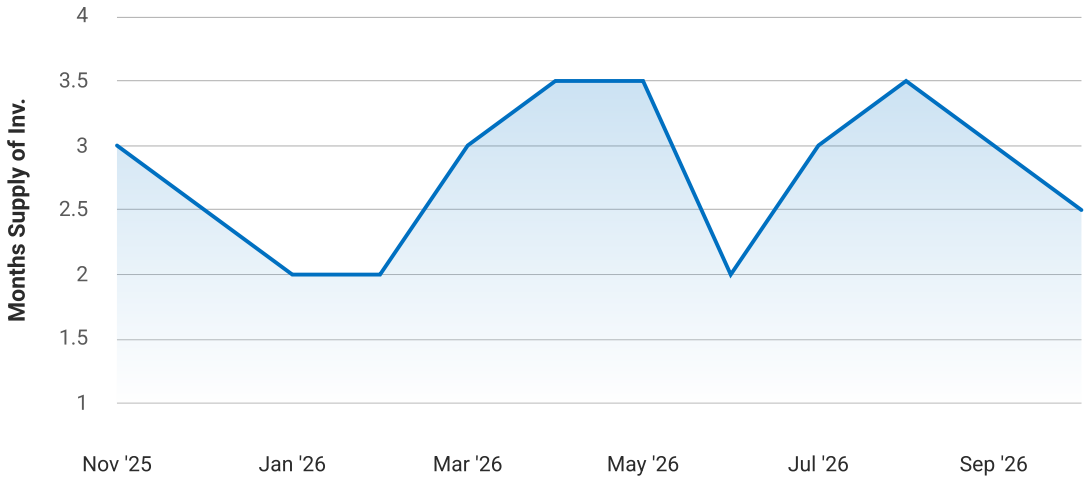

Single Family Residence

This graphic summarizes key statistics that describe the given month's inventory level and the percentage change in the last month and year. Months of inventory is the number of months it will take a market to absorb the inventory that's available at the end of the month, based on the number of properties that typically go into pending each month. RPR calculates months of inventory by dividing the count of listings that were active on the last day of the month by a rolling 12-month average of newly pending listings.

Sold Public Records

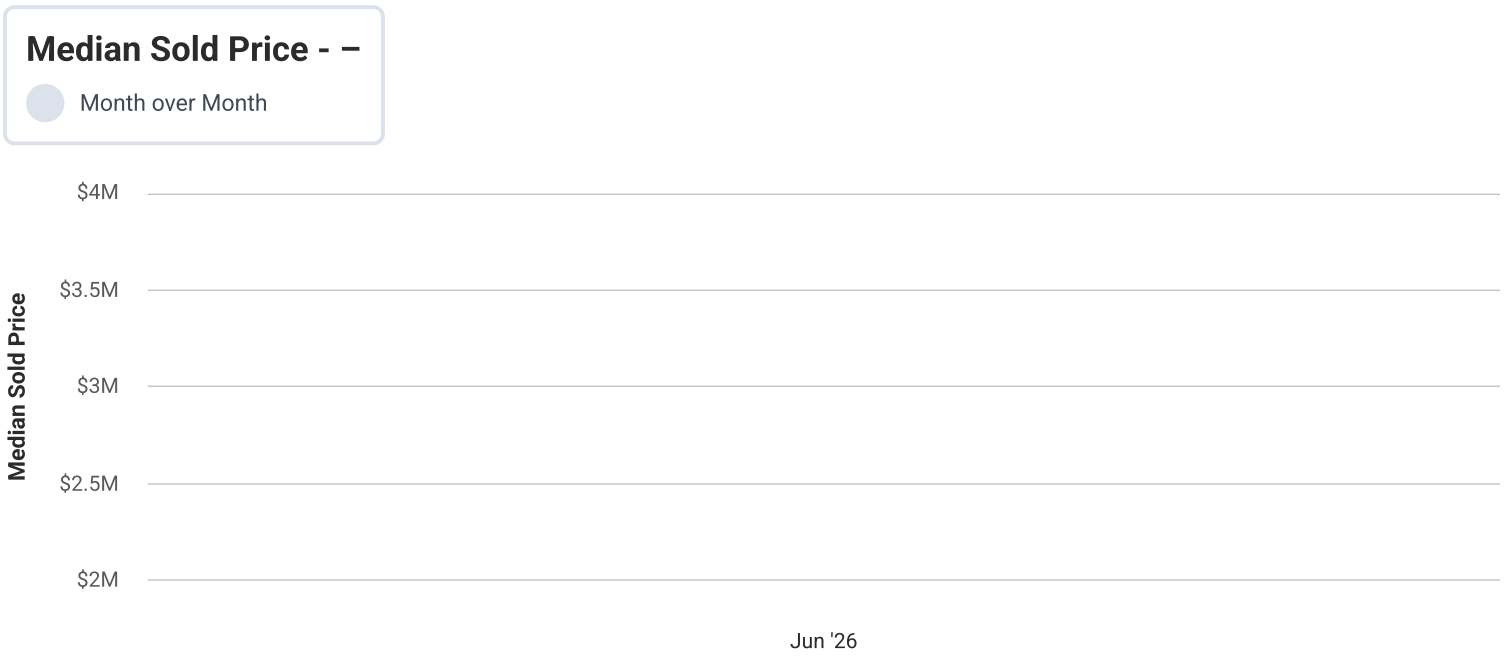

Peninsula in Long Beach, CA

Single Family Residence

This graphic summarizes key statistics for properties that are sold each month. RPR uses a combination of dates in deed and assessment records to determine qualifying sale transactions each month. These statistics offer a complete view of everything that sold in a market area, whether it was listed in an MLS or not. Data is less accurate in non-disclosure states where some or all sale prices are not available through the public record. Non-disclosure states include Alaska, Idaho, Kansas, Louisiana, Mississippi, Missouri (some counties), Montana, New Mexico, North Dakota, Texas, Utah, and Wyoming. Note: Some counties, especially in rural areas, do not provide timely data updates.
